

Hello world

Tom Chothia

August 21, 2020

1 Introduction

Latex is a type setting system, you compile tex files into pdfs. This file has a few examples, it's easy to find anything else you need on google.

2 Background

References are done using a bib file. e.g. this [2], this [1] or this [3].

3 Figures and Tables

Tables can be very useful, see Figure 1.

4 Some maths

Math model makes type setting maths easy, e.g., $x = y^4$

$$E_0 = mc^2 \tag{1}$$

$$E = \frac{mc^2}{\sqrt{1 - \frac{v^2}{c^2}}} \tag{2}$$

Travel Method	Time	Cost	Ease
Bus	40mins	£2.40	3
Train	20mins	£3.40	2

Figure 1: Methods of travel to work

$$E_0 = mc^2 \tag{3}$$

$$E = \frac{mc^2}{\sqrt{1 - \frac{v^2}{c^2}}} \tag{4}$$
