7Wonders Farragut (CURRENT)	**1**	100%

What role were you assigned?
Super Administrator	**2**	25%
Teacher	**2**	25%
Student	**4**	50%
Other	**0**	0%

What username(s) were you assigned?

fergusam1 fergusam2   edwardgp, edwardgp1   egannj & egannj1   warwickm1
warwickm2

What courses were you enrolled on?

IT Service Desk course   IT Service Desk test course   IT Service Desk Test Course

7Wonders Evaluation

A Little Bit on Testing

Overall, how do you feel the platform performed?

Very well, it was robust against testing with clear error messages at each stage. Buttons
were clearly labeled and limits were imposed on student accounts with limited access.
I had an issue where I was logged out of the system on ocassion, and was not sure

why? Hitting the back button allowed me to continue. (Using firefox on a Mac.) I wasn't too sure about editing the announcements and module descriptions using html as am only a little bit familiar with it, but I guess the staff/students this is aimed at will find it a breeze. I wanted the option to be able to mark multiple messages in the notification centre as read, rather than doing it individually. I tried to set an assessment as a staff member, but not sure what happened. I would like to be able to see on the left hand menu only the things that I have the right to see. These are just minor things, overall I think its really good.   UI is very good, and it makes sense what I need to click on. Creating tests was about the same as Canvas or WebCT. It was a little slow at times, but that is to be expected.   Overall speed and responsiveness was excellent.

**If you were a student, did you set any targets for yourself?**

Yes	3	75%
No	1	25%
Not a Student	0	0%
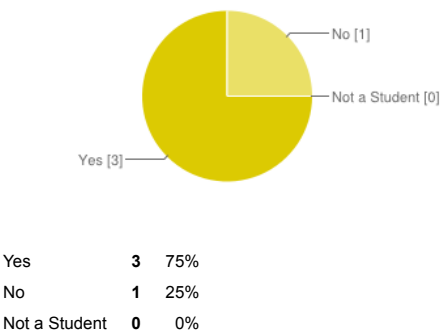

If you were a student and did not set a target, why?

Couldn't load the Set Targets page, got stuck in a login loop.

If you were a student, and did set a target, how easy was it to set up?

Very easy. Initially tried with a target of 25% as a test, but was clearly informed that it needed to be above 40% to continue, so set it at 45% and it was set successfully and easily.   Very easy, no problems here   Easy

**Did you know you had Staff-set Targets?**

Yes	4	100%
No	0	0%
Not a student	0	0%
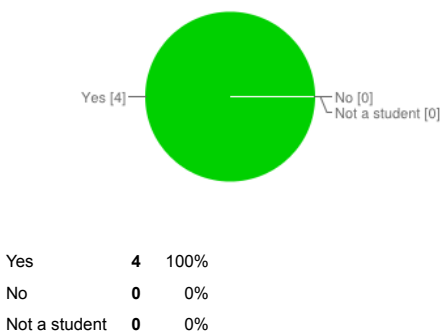

Did you find the Email Notifications useful?

| Yes | 4 | 100% |
| No | 0 | 0% |
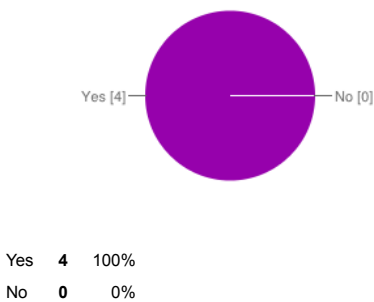

If you didn't find the email notifications useful, how can they be improved?

Did you use the 'Notification Center'?

| Yes | 3 | 75% |
| No | 1 | 25% |

**If no, why? If yes, did you find it useful, and why?**

I didn't see it.   Yes it was useful to read the emails that had been sent out, without having to login to email separately. Layout was clear and concise.   found this more useful then checking my gmail when I was actually working on the site.

Did you ever trigger the 'Early-Warning system'?

Yes	**3**	75%
No	**1**	25%
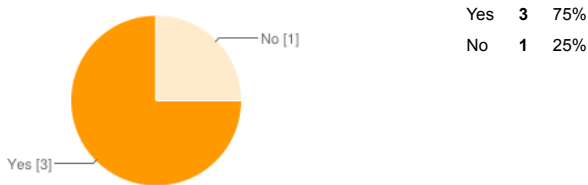

If yes, do you think it's useful. If not, read the help text, and let us know if you feel it's useful

Yes	**4**	100%
No	**0**	0%
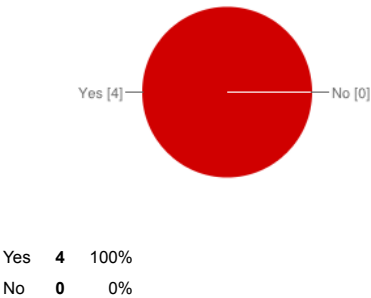

What do you think of the 'Early-Warning System'?

I've never seen it before - has the potential to be very useful.   I think it's a great idea to let students (and tutors) know that a student is struggling in a certain area and provides useful information on performance so that improvement can be seen at a future date.   I thought it was a great idea and one that both the student and teacher will benefit from. was a word incorrect in the Early warning email it states: to ensure that you don't suffer *they* additional stress from this mark.   I like it. It's a feature I've not seen anywhere else, and I think it would be really useful to tutors.
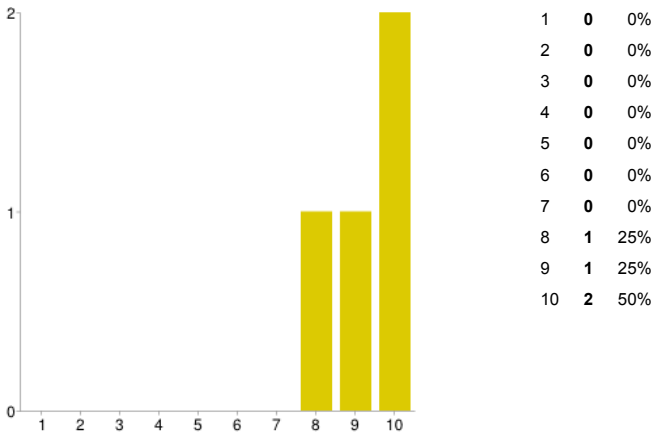

There are plenty of features of 7Wonders, such as editing pages for Administrators and course tutors through to recommending texts, for which there would be too many questions. State which features you used from the platform and what you thought about them

Module recommendation of text (used electronic library resource). It allows students to provide a recommended text which may help other students to understand the subject matter. Text can then be validated by the course creator before the content goes live, allowing validation of the resource.   I could only complete a quiz as a student, was unable to do so as a member of staff. Confused a little by the wording assessment and assignment, the same thing? Sorry me probably being stupid.   I built and assignment and set some targets. I also set some new targets based on the marks of students who were failing. All pretty simple stuff, but it all worked.   All I've used so far is creating and enrolling users. The enrollment process could be improved - if you don't know the course number it's difficult to find out without asking someone who does know it.

Any other feedback?

Nothing of note!   Question about MathJax, again so sorry I haven't a clue, just looks well complicated. I used it on my mobile phone and had a really good experience with it. I think that's it.   A very strong website created and with great content and very well thought out from a student and tutors perspective.

Number of daily responses

The concepts of it (Early-Warning, Dynamic Pages, Module Recommendations) are novel and would prove useful
